

Questionnaire Protocol

The questionnaire is organized around a few sequential domains that allow us to relate responses pertaining to participants' identities, professional activities and interactions, and attitudes toward data-sharing operations. It should take around 30 minutes to complete.

1. Participants' professional backgrounds and experiences

The purpose of this section is to better understand participants' professional backgrounds and their roles within their projects.

- Which CITF Databank-affiliated project are/were you a part of?
 - *Select from a prepared list of projects*
- What was your role in your project?
 - *Select one or more options from a list, including blank options for participant-defined roles*
- How did you find yourself in this role?
 - *Open text box*
- Please describe any specific experiences that prepared you for working in this role?
 - *Open text box*
- Please describe any challenges you may have experienced while adjusting into your position with the project.
 - *Open text box*

2. Independent and collaborative activities

This section asks about specific actions and interactions that the participant engages in as part of their work involving the CITF Databank.

- What activities does your work entail?
 - *Select one or more options from a list, including blank options for participant-defined activities*
- What activities does your work entail when working on CITF Databank-related tasks specifically?
 - *Select one or more options from a list, including blank options for participant-defined activities*

- When working with others while doing tasks that relate to the CITF Databank, what roles do those other people usually occupy?
 - *Select one or more options from a list, including blank options for participant-defined roles*
- *For each selected role:* Please describe the activities you typically did while working with people in this role.
 - *Open text box*
- *For each selected role:* How did you usually communicate with people in this role?
 - *Select from a list of options, including blank options for participant-defined means of communication*
- *For each selected role:* What were some challenges you experienced while working with people in this role?
 - *Open text box*
- *For each selected role:* Please describe how you overcame these challenges.
 - *Open text box*

3. Impact and change over time

This section is concerned with participants' experiences engaging as part of data-sharing initiatives, and the potential impact that the CITF Databank may have had on shaping participants' subsequent experiences.

- Have you participated in data-sharing initiatives like the CITF Databank before or after working with the CITF Databank?
 - *Before: Yes / No*
 - *After: Yes / No*
- *If yes to either:* What distinguished your experience with the CITF Databank in relation to your other experiences?
 - *Open text box*
- *If before/no:* Please describe some things that surprised you about the experience working with the CITF Databank.
 - *Open text box*
- *If after/yes:* Please describe any ways in which your experience working with the CITF Databank prepared you for subsequent data sharing experiences.
 - *Open text box*
- Has working with the CITF Databank affected how you work in general, including in contexts not relating to data sharing? If so, please describe them here, including specific recollections or examples, if applicable.
 - *Open text box*

4. Demographic data

This section supports aggregate analysis of questionnaure responses.

- What is your gender?
 - *Man / Woman / Nonbinary / Other / Prefer not to answer*
- What was your institutional affiliation at the time when you were working with the CITF Databank?
 - *Multiple write-in options / Prefer not to answer*
